

Attention 4th and 5th

Grade Panthers!

Are you interested in
science and technology?
Robots, research and teamwork?

If so, then join the first ever

FIRST Lego League teams at DG Cooley!

Each team meets during the week to practice beginning in September and prepares for a competition in November. Team members work together, with their coaches' support, to program an autonomous robot and research and design an innovative solution related to an annual theme.

Cost to participate is \$25. All other expenses for the program will be covered by the Panthers PTO. The number of students we can allow to participate is contingent upon the number of parents willing to volunteer to coach and we need two coaches per team. Practices will take place at the school, days and times will be decided upon by the coaches. Stop by the PTO table at DG Cooley's Open House on August 15 to register your student and/or sign up to coach. To get your questions answered sooner email Lacy Morise at legoleague@pantherspto.org.

We plan to offer the program to all DG Cooley students next year, after piloting the program this year.
